About IANUS

IANUS' Vision is to provide Innovative solutions in the Field of Operations.

"The secret to getting ahead is getting started."

management of EU and National projects.

- Mark Twain -

Introduction

MAESTRO is an incident management platform, which is fully customized to meet the needs of our customers. Defense Forces and Civil Security Agencies such as Police, Firefighters, Emergency Medical Teams and First Responders are provided with an array of tools and technologies which ensure their operational efficiency and effectiveness, strengthening their operational capabilities to the highest extent.

Concept

- Starting as an ambition to provide a real Command, Control, and Information platform with Common Operational Picture (COP) capabilities to First Responders (FRs) in the field.
- Based on <u>IFAFRI</u>'s identified capability gaps.
- Understanding the value of real time information flow between the FRs in the field and the C2 center.
- An outcome of the EU research project.
- Tested and evaluated in several demonstrations (TRL 7).
- Continuous development cycles with FRs.

Key value points

- Designed and developed in-house by IANUS. Full ownership of IPRs, Cyprus product.
- Co-development with several FRs with the Cyprus Fire Service being the primary end-user.
- Embraced by the Cyprus Fire Service in several live field demonstrations.
- Continuous upgrades to provide SOTA functionalities.

Features

Modular software based on open architecture.

Operation in all echelon levels (local, regional, national).

Easy to use with smart and user-friendly interface.

Especially designed to be adaptable to all first responders' services.

Covering current identified gaps of C2 tools.

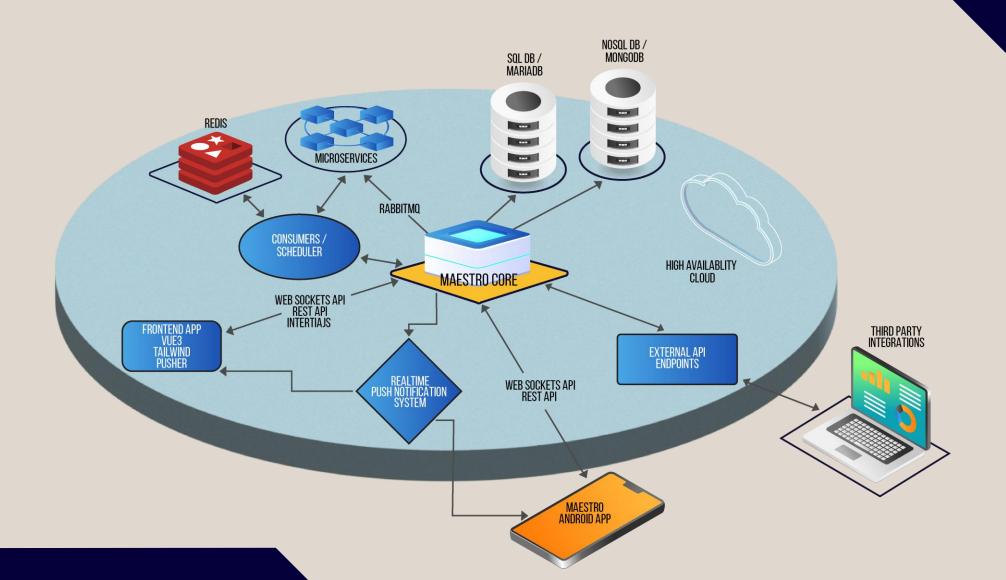

A perfect tool for training, planning, and managing incidents.

Deployment on cloud (private or public)

MAESTRO Architecture

Maestro Dashboard

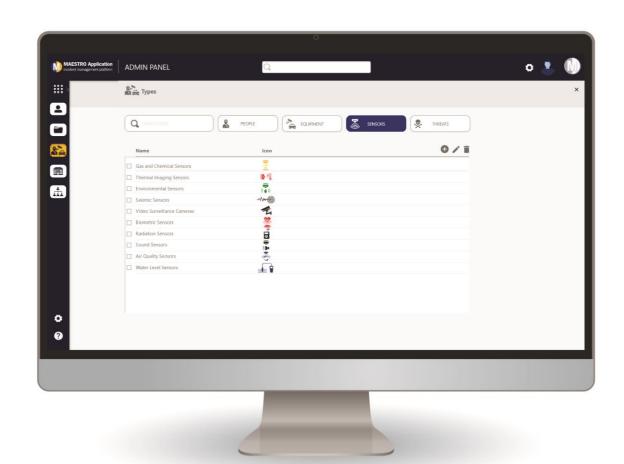

- Departments, users, equipment, fleet, duty roster, access rights etc.)
- Case management
- Common Operational Picture
- Chat services
- Third party (sensors network, cameras, CBRN sensors, UAV video streaming, etc.)

Resource Management

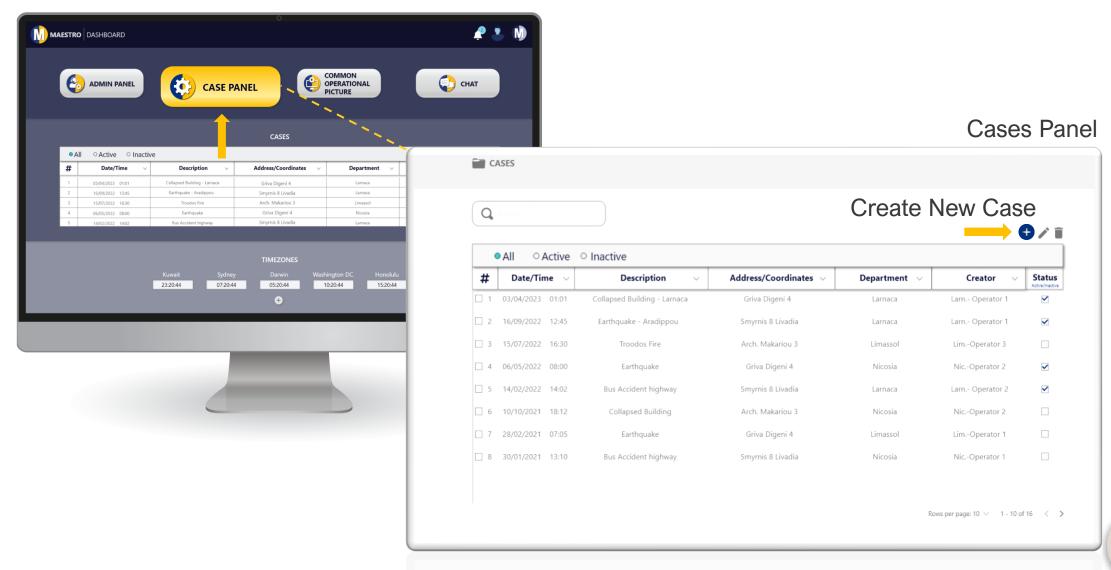

- Administrator dashboard for resource management
- Manages First Responders, materials, machinery, equipment, and fleet
- Covers any other resources required for missions
- Ensures effective use of internal and external resources
- Optimizes mission accomplishment and resource allocation

Future Roadmap and Next Steps

Enhancements to further empower first responders and defense agencies

Integrating advanced Al capabilities for predictive analytics and optimizing resource allocation.

Exploring opportunities to extend MAESTRO's application in the defense sector, enabling our platform to bolster national security and emergency preparedness.
